New Pacific Liner.

PHILADELPHIA, May 29—the new Pacific liner Sierra was successfully launched at Cramps' yard this morning. Several hundred persons, including the officials of the Oceanic Steamship Company of San Francisco and the officers and experts of the Cramp corporation, saw the launching. Miss Cassie L. Hayward, daughter of Captain Henry M. Hayward, who is to command the new steamship, officiated as sponsor and gave the handsome craft her baptism of champagne as she started for the water. At the conclusion of the launching an elaborate luncheon was served and several congratulatory speeches made.

The Sierra is one of the three steamships which the Cramps are building for the Oceanic Steamship Company and, with the exception of the American liners St. Louis and St. Paul, she is the largest passenger carrier ever constructed here. The Sierra and her sister ships are to be operated from San Francisco to Hawaii, Samoa and Australia. The principal dimensions of the Sierra are: Length between perpendiculars, 400 feet; extreme breadth, 50 feet; depth, 43.6 feet; displacement, 7000 tons; speed, 17 knots. The contract for the steamer was signed March 6, 1899. It is expected that the Sierra will be completed in time for delivery in San Francisco before September 1st.

Notice to Shipmasters.

U. S. Branch Hydrographic Office, San Francisco, Cal.
By communicating with the Branch Hydrographic Office in San Francisco, calculating of vessels who will co-operate with the Hydrographic Office by recording meteorological observations suggested by the office, can have forwarded to them at any desired port, and free of expense, the charts and the latest information regarding the dangers to navigation in the waters which they frequent.

Mariners are requested to report to the chart room, discovered, or any other information which may be utilized for correcting charts or sailing directions, or in the publication of the color charts of the North Pacific. C. G. CALKINS, Lieut.-Comdr. U. S. N. in Charge.
